LEONARDO is an EU-funded project that helps industries use energy more efficiently by unlocking collaborative industrial demand flexibility through the aggregation of diverse Energy Management Systems (EMSs).

The Figures

11 Partners

1.75 M€ Funding

6 Countries

36 Months

The Solution

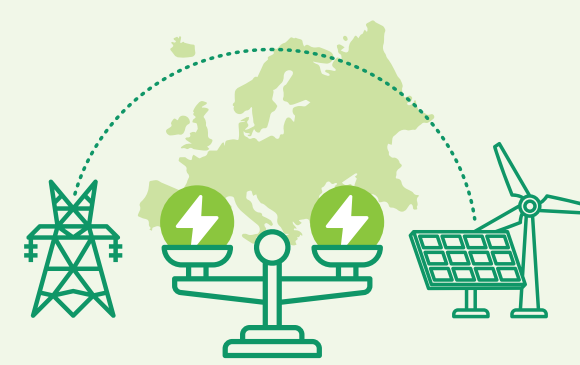

Link energy systems

Connect diverse industrial Energy Management Systems to enable coordinated flexibility.

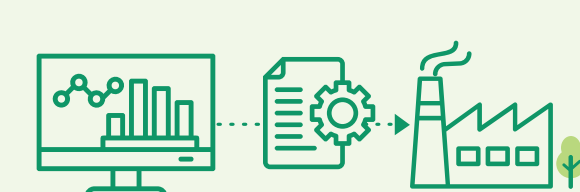

Demonstrate solutions

Validate flexibility services in real environments.

Support grid stability

Help balance Europe's energy system.

Promote replication

Develop tools that support a wider market adoption.

The Pilot sites

ITALY – Storo Industrial Cluster

AUSTRIA – Southeastern Styria

BULGARIA & GREECE – Transnational Cluster
